RECEIVED
FEB 20 2003
GROUP 3600

IN THE CLAIMS:

Please enter the following amended claims:

1. (Amended) An electronic data management system which comprises a controller for executing a program stored in a memory while being connected to an input device for data input, storage units, and a data reader for reading data stored in a first recording medium, wherein said storage units comprise a first storage unit which stores an electronic data record file including electronic data, and a second storage unit which stores a log file including log data representing input or update log of the electronic data recorded on said electronic data record file,
